

1

## Choose the amount of leads you need

Select the package of leads that suits your needs.

2

## Place Secure Order

Fill in payment details and complete the payment.

3

## Access Client Panel to collect leads

Choose whether you wish your leads to be collected within your existing account or create new account.

4

## Sign In or Sign Up

If you decide to collect leads to your existing account just sign in with your login details otherwise create new account.

5

## Edit the new ad

When you access your account you will find the ad with the 'new' status that will have to be edited before it will start collecting leads.

6

## Provide Title and Description for your ad

When creating your ad please remember the Title 50 characters or less (including spaces) and the Description 150 characters long or less (including spaces).

The created ad will be distributed through our network until it collects ordered amount of leads.

Example:

*Title:*

*Hit your targets every time with GetResponse!*

*Description:*

*Be the first to get the latest blog posts, articles, and research reports! Get topic summaries and links delivered FREE to your inbox!*

7

## Submit Your Ad

Before the advertisement is placed online it requires approval. Once submitted our Support Team will review it and contact you if any changes to the ad are needed.

When your ad is reviewed and approved by our Support Team your ad will start collecting leads that can be delivered to your GetSubscribers Account and then exported to .csv file, Your Email or your GetResponse account.
